

KCMQS PROJECT NO. N1054

New Additions and Alterations to the Existing Nursing Science Simulation Building at the University of Venda, Thohoyandou, Limpopo Province

(CIDB GRADING NO: 5GB)
VOLUME 2 OF 2

PROCUREMENT DOCUMENT

(Based on NEC3 Engineering and Construction Contract)

Date of Issue: 09 May 2022

Issued by:

Director Facilities Management

University of the Venda, Thohoyandou

Name of tenderer:	 	 •••••
Telephone Number:	 	
Email Address:	 	
Fax Number:	 	
Cellphone Number:	 	

Closing date: AS PER TENDER INVITATION

PREAMBLES FOR TRADE

PREAMBLES FOR TRADES

MODEL PREAMBLES FOR TRADES

The "Specification of Materials and Methods to be used - PW371" as issued by the Department of Public Works shall apply and shall be deemed to be incorporated herein.

The Bidders are referred to the above-mentioned document for the full description of materials to be used and work to be executed.

A copy of the above-mentioned document is available at the offices of the Principal Agent for inspection.

2. VARIATIONS AND/OR ADDITIONS TO MODEL PREAMBLES FOR TRADES

- 2.1 All work to be done in accordance to the detailed specification as per the Engineers and Architects drawings.
- Where variations and/or additions to Model Preambles differ from Clauses contained in the "Specification of Materials and Methods to be used PW371", the variations and/or additions to Preambles shall take precedence.

3. MATERIALS AND WORKMANSHIP

Materials and workmanship shall be the best of their respective kinds. Only undamaged materials may be used in the works. Work shall be to the satisfaction of the Architect/Engineer and shall be executed in accordance with good building practice and the relevant Manufacturer's instruction. Where the term "approved" is used in connection with materials and workmanship, it shall mean that such materials shall be to the approval, instructions or choice of the Architect.

4. STANDARD SPECIFICATIONS

Materials and Workmanship shall comply with the Standard Building Regulations (SBR), National Building Regulations (NBR), SABS1200, the specifications and codes of practice of the South African Bureau of Standards, and CSIR recommendations. In cases of variance, these "Specification of Materials and Methods to be used -PW371" and any supplementary preambles thereto shall have precedence over the above-mentioned regulations, specifications and codes of practice. In cases of variance between the SBR and NBR, the NBR shall have precedence.

The latest issues of the above-mentioned regulations, specifications and codes of practice, as well as those of any other specifying body, to which reference is made, shall be applicable.

References to standard specifications and/or building regulations in these "Specification of Materials and Methods to be used - PW371" are for the information of the Contractor and shall in no way relieve him of his obligations under the Contact.

SECTION 1: PRELIMINARIES

Item No		Quantity	Rate	Amount	
	SECTION 1				
	BILL NO. 1				
	PRELIMINARIES				
	PRELIMINARIES				
	i) The NEC3 Engineering and Construction Contract Option B: Priced contract with bill of quantities (Third edition of June 2005 reprinted in April 2013) in conjunction with the Contract Data is taken to be incorporated herein				
	ii) The tenderer is deemed to have taken cognizance of the above mentioned documents for the full intent and meaning of each clause. These clauses are referred to by clause number and heading only				
	iii) The amount of Preliminaries to be included in each monthly payment certificate shall be assessed as an amount prorated to the value of the work duly executed in the same ratio as the preliminaries bears to the total of prices excluding any contingency sum and the amount for Preliminaries				
	iv) Where the initial contract period is extended, the monthly charge shall be calculated on the basis as set out in (iii) but taking into account the revised period for completing the works			5	
	Carried to Collection		R		
	Section No. 1 PRELIMINARIES AND GENERAL Bill No. 1				
	PRELIMINARIES & GENERAL				

N984

	v) The amount or the items of the Preliminaries are adjusted to take account of the theoretical financial effect which changes in time or value (or both) have on this section. Such adjustments shall be based on adjustments in the following categories as recorded in the Bills of Quantities:				
	a) an amount which is not varied, namely fixed b) an amount which is varied in proportion to the contract value, namely value related; and c) an amount which is varied in proportional to the construction period as compared to the initial construction period excluding revisions to the construction period for which the contractor is not entitled to adjustment in terms of the contract, namely Time Related				
	Where no provision is made in Bills of Quantities to indicate which of the three categories in (v) apply or where no selection is made, the adjustments shall be beased on the following breakdown:				
	a) 10 percent is Fixed b)15 percent is Value related c) 75 percent is Time Related				
The second secon	The adjustments of the Preliminaries shall apply not withstanding the actual employment of resources in the execution of the works. The contract value used for the adjustment of the Preliminaries shall exclude any contingecy sum and the amount for Preliminaries

SECTION 2: BUILDING WORKS

ltem No		Quantity	Rate	Amount
	SECTION NO. 2			
	BILL NO. 1			
	<u>FOUNDATIONS</u>			
	For Preambles refer to "Department of Public Works: Specification of material and methods to be used - PW371"			
	SUPPLEMENTARY PREAMBLES			
	Nature of ground			
	The nature of the ground is assumed to be sandy weathered granite, therefore "earth", but possibly interspersed with "hard rock"			
	Excavation for working space in rock			
	Notwithstanding clause 11 page 8 of the Standard System of Measuring Building Work, excavation for working space in rock will be measured in cubic metres to the extent executed and given as "extra over" bulk excavation or trench and hole excavation as the case may be			
	Carting away of excavated material			
	Descriptions of carting away of excavated material shall be deemed to include loading excavated material onto trucks directly from the excavations or, alternatively, from stock piles situated on the building site			
	<u>Filling</u>			
	Notwithstanding the reference to prescribed multiple handling in clause 1 page 6 of the Standard System of Measuring Building Work, prices for filling and backfilling shall include for all selection and any multiple handling of material	٠		
	Carried to Collection		R

	BILL NO. 2				
	CONCRETE, FORMWORK AND REINFORCEMENT				
	For Preambles refer to "Department of Public Works: Specification of material and methods to be used - PW371"				
	SUPPLEMENTARY PREAMBLES				
	Cost of tests				
	The costs of making, storing and testing of concrete test cubes as required under clause 7 "Tests" of SABS 1200 G shall include the cost of providing cube moulds necessary for the purpose, for testing costs and for submitting reports on the tests to the architect. The testing shall be undertaken by an independent firm or institution nominated by the contractor and to the approval of the architect. (Test cubes are measured separately)				
	Breeze concrete				
	Breeze concrete shall consist of twelve parts clean dry furnace ash, free from coal or other foreign matter, to one part cement (12:1), the ash graded up to particles which will pass a 16,5mm ring from a minimum which fails to pass a 4,75mm mesh. The finer materials from the screening are to be first mixed with the cement into a mortar and the ash added afterwards and thoroughly incorporated

<u>Formwork</u>		Î			
Description of formwork shall be deemed to include use and waste only (except where described as "left in" or "permanent"), for fitting together in the required forms, wedging, plumbing and fixing to true angles and surfaces as necessary to ensure easy release during stripping and for reconditioning as necessary before reuse					
The vertical strutting shall be carried down to such construction as is sufficiently strong to afford the required support without damage and shall remain in position until the newly constructed work is able to support itself					
Formworks to soffits of solid slabs etc shall be deemed to be slabs not exceeding 250mm thick unless otherwise described					
Formwork to soffits of slabs, beams, etc shall be deemed to be propped up exceeding 1,5m and not exceeding 3,5m high unless otherwise described					
Formwork to sides of bases, pile caps, ground beams, etc will only be measured where it is prescribed by the engineer for design reasons. Formwork necessitated by irregularity or collapse of excavated faces will not be measured and the cost thereof shall be deemed to be included in the allowance for taking the risk of collapse of the sides of the excavations, provision for which is made in "Earthworks"					54

	Descriptions:				
	Items described as "nailed" shall be deemed to be fixed with hardened steel nails or pins or shot pinned to brickwork or concrete				
	Items described as "plugged" shall be deemed to include screwing to fibre, plastic or metal plugs at not exceeding 600mm centres, and where described as "bolted" the bolts have been given elsewhere				
	SUSPENDED CEILINGS				
	Carried to Collection		R		
	Section No. 2 BUILDINGS (PROVISONAL) Bill No. 7 CEILINGS, ETC.				

	Lay Gyproc Gyprex® White 600mm x 600mm ceiling tile into the Gypframe™/DONN ceiling grid. Ceiling grid consisting of Gyproc/DONN Wall Angle (SM25/M6) fixed to the perimeter wall using fixings at 300mm centres. Space Gypframe™/ DONN Main Tees T38 FR at 1200mm centres. Suspend main tees using Gyproc Prestretched Galvanised Hanger wire 2.5mm thick or Gyproc hanger strap 19mm at 1200mm centres. Gyproc Pre-stretched Galvanised Hanger wire shall be put through the main tees hole and would wind 3 times around itself. 2 steel pop-rivets or one Gyproc Wafer Head Tek screw 13mm shall be used to fix the hanger strap to the main tees web. Install Gypframe™/DONN Cross Tees T38V/T32V (1200 long) at 600mm centres to create a 1200mm x 600mm ceiling grid. Install Gypframe™/DONN Cross Tees T38V/T32 (600 long) into the 1200mm long cross tees to create a 600mm x 600mm grid. Main tee should be fixed to the wall using angle cleats. Install Isover 135mm thick Aerolite non-combustible light weight Glasswool thermal ceiling insulation, nominal density 12kg/m³.				
1	Ceilings suspended not exceeding 1m below timber/steel purlins at 900mm centres (trusses not exceeding at 1m centres)	m2	22		
	OWAcoustic®Sandila/N biologically absorbable mineral wool ceiling tiles, size 1200 x 600 x 15mm thick with square edge and white painted finish, laid on fire rated OWAconstruct® S3 exposed demountable T24 suspension system, comprising galvanised main tees and cross tees at with main tees suspended by means of galvanised hangers at centres not exceeding 1200mm with ceiling perimeter finished with OWAconstruct Perimeter L-trim, plugged and screwed at 200mm centres, and all installed to manufacturer's instructions.				
2	Ceilings suspended not exceeding 1m below timber/steel purlins at 900mm centres (trusses not exceeding at 1m centres)	m2	406

	PAINTWORK			
	For Preambles refer to "Department of Public Works: Specification of material and methods to be used - PW371"			
	ON FLOATED PLASTER			
	Plascon Double Velvet to interior new cement plaster (NW 200). Surface to be dry, sound and clean and cured for a minimum of 14 days, with a moisture content measured with a Doser Hygrometer (or equivalent), of BD 2 scale - 8% or less. Prime with one coat of Plascon Plaster Primer (UC 56) with an overcoating time of 16 hours and finish with two coats of Double Velvet (VEL) with 2 hours drying time between coats, for a maintenance cycle of 7 years in a C1 - inland environment.			
1	On internal walls m2	1,283		
	Dulux Weatherguard modified acrylic paint (colour to be selected) to exterior cement plaster. Surface to be clean, dry and dust free with a moisture content of less than 15%. Prime surface with one coat Dulux Primer for New Plaster (Code: D36) with an overcoating time of 18 hours and finish with two coats Dulux Weatherguard (Code: D20), thinning the first coat up to 10% with water with an overcoating time of 4 hours.			
2	On external walls m2	55		
	ON SMOOTH CONCRETE			
	Carried to Collection		R	
	Section No. 2 BUILDINGS (PROVISONAL) Bill No. 14 PAINTING			

	Plascon Polycell Ripple Finish to interior new cement plaster (NW 241). Surface to be dry, sound and clean and cured for a minimum of 14 days, with a moisture content measured with a Doser Hygrometer (or equivalent), of BD 2 scale - 8% or less. Prime with one coat Plascon Plaster Primer (UC 56) with an overcoating time of 16 hours and finish with two coats Polycell Ripple Finish (990101) with 16 hours drying time between coats, for a maintenance cycle of 7 years in a C1 - inland environment.					
3	On concrete soffits	m2	110			
	Prepare and apply one coat "Plascon" universal undercoat and two coats "Plascon Polvin" exterior quality acrylic paint		1			
4	On concrete columns	m2	3			
	ON FIBRE-CEMENT					
	Plascon Professional Gloss Enamel to exterior new fibre cement (NW 172). Surface to be dry, sound and clean, with a moisture content, measured with a Doser Hygrometer (or equivalent), of BD 2 scale - 8% or less. Prime with one coat of Professional Primer (PP 700) with an overcoating time of 16 hours and finish with two coats of Professional Gloss Enamel (PSB 800) with 16 hours drying time between coats, for a maintenance cycle of 2 years in a C1 - inland environment.					
5	On fascias and barge boards not exceeding 300 mm girth	m2	28			
	ON WOOD					
	Carried to Collection			R	2	_
	Section No. 2 BUILDINGS (PROVISONAL) Bill No. 14 PAINTING					

6	Plascon Professional Eggshell Enamel to interior new wood. Surface to be dry, sound and clean. Wash knots and resinous areas with Lacquer Thinners (ILS 1) and coat with Woodcare Knot Seal (PK 2) and apply one coat of Plascon Woodcare Pretreatment (WWP 1), overcoated within 48 hours with a moisture content, measured with a Doser Hygrometer (or equivalent), of BD 2 scale (A1-A5) < 14% or less. Prime with one coat Professional Wood Primer (PP 800) with an overcoating time of 16 hours and finish with two coats Professional Eggshell Enamel (PSB 700) with 16 hours drying time between coats, for a maintenance cycle of 5 years in a C1 - inland environment.	m2	106		
	ON METAL				
	Remove all loose factory primer rust millstrate, etc. prepare and apply one coat Namelcote Zinc Chromate Metal primer (US.53), apply one coat of Merit Undercoat (UC.1), and two coats "Plascon Super Universal Enamel" paint (Colour: PWD G18)				
7	On door frames	m2	42		
8	On columns and beams	m2	6		
9	On rails, bars, pipes, etc not exceeding 300 mm girth	m	4		
	PAINTWORK ETC TO PREVIOUSLY PAINTED WORK				
	ON METAL

	WATER SUPPLIES			
	For Preambles refer to "Department of Public Works: Specification of material and methods to be used - PW371"			
	SUPPLEMENTARY PREAMBLES			
	"Polycop" polypropylene pipes:			
	Polypropylene pipes 54mm diameter and under shall be seamless copper coloured class 16 pipes jointed with "Fast-fuse" heat welded thermoplastic or brass compression fittings as designed for use with copper pipes as stated			
	Pipes shall be firmly fixed to walls etc with coloured nylon snap-in pipe clips with provision for accommodating thermal movement and jointed and fixed strictly in accordance with the manufacturer's instructions			
	All pipe diameters are nominal external			
	"Polylink" polypropylene pipes:			
	Polypropylene pipes 63mm diameter and over shall be class 12 pipes jointed with cast iron "Supraclamp" running joints			
	Fusion welded bends, once or twice mitred as necessary, and tees shall be factory manufactured			
	Fusion welded bends and tees shall include jointing to pipes with PVC rubber ring double Z joint couplers			
	Carried to Collection		R	
	Section No. 3 PLUMBING & DRAINAGE (PROVISIONAL) Bill No. 4 WATER SUPPLIES			

	Branch tees shall include flanged and bolted joints to "Polycop" branch pipes in addition and for brass compression male iron to copper straight couplers					
	Reducers shall include jointing to pipes with PVC rubber ring double Z joint couplers and reducers shall be of sufficient overall length to accommodate same					
	All pipes shall be jointed and fixed strictly in accordance with the manufacturer's instructions					
	All pipe diameters are nominal external					
	WATER SUPPLIES					
	The following in trenches for pipes (pipes e/m)					
1	Excavation not exceeding 2m deep	m3	114			
2	Risk of collapse to sides of trench and hole excavations not exceeding 1,5m deep	m2	228			
3	Backfilling to trenches, holes, with materials obtained from excavations compacted in 150mm layers to 90% Mod AASHTO density	m3	63		5	
4	Backfilling to trenches, holes, with selected materials obtained from excavations compacted in 150mm layers to 90% Mod AASHTO density to form fill blanket	m3	17			
5	Backfilling to trenches, holes, with selected materials supplied by the contractor compacted in 150mm layers to 90% Mod AASHTO density to form fill blanket					
		m3	17			
6	Backfilling to trenches, holes, with selected granular supplied by the contractor materials compacted in 150mm layers to 90% Mod AASHTO density to form bedding cradle					
		m3	17

SECTION NO. 5			
BILL NO. 1			
PROVISIONAL AMOUNTS ETC			
PROVISIONAL SUMS FOR SELECTED SUB- CONTRACT WORKS			
SUPPLEMENTARY PREAMBLES			
General			
All prime cost amounts and provisional sums are net and include for delivery to site of all articles concerned			
Sub contractors will be treated as domestic sub contractors for the purpose of this contract. They shall be selected sub contractors and the main contractor will be afforded the opportunity to reject such sub contractors prior to appointment provided reasonable justification is given			
<u>Profit</u>			
Where stated, the contractor may allow for profit if required			
General attendance upon selected sub-contractors			
The item "Attendance" which follows each provisional sum for selected sub-contractors work, shall be deemed to cover all the contractor's costs incurred in providing free of charge to the selected sub-contractors, the following:			
1. The services as in line with the Preliminaries			
2. Making good in all trades and cleaning down and removal of rubbish on completion			
Carried to Collection		R
